Excluded from automatic  
downgrading and declassification

**WARNING**

This material contains information affecting the National Defense of the United States within the meaning of the espionage laws, Title 18, USC, Secs. 793 and 794, the transmission or revelation of which in any manner to an unauthorized person is prohibited by law.

SEARCH FOR MISSILE-RELATED ACTIVITY,  
KAMCHATKA PENINSULA, USSR

25X1D

25X1A

25X1A

A special evaluation of [REDACTED] was made for the purpose of negating or confirming missile or related electronic activity. The small scale and obliqueness of the photography, as well as snow cover limited conclusive evaluation. The only area where it was possible to determine that there was no missile/electronics activity was a small area along the northern coast of Poluostrov Ozerney, shown in Figure 1. The only electronics activity noted was the Uka tracking station.

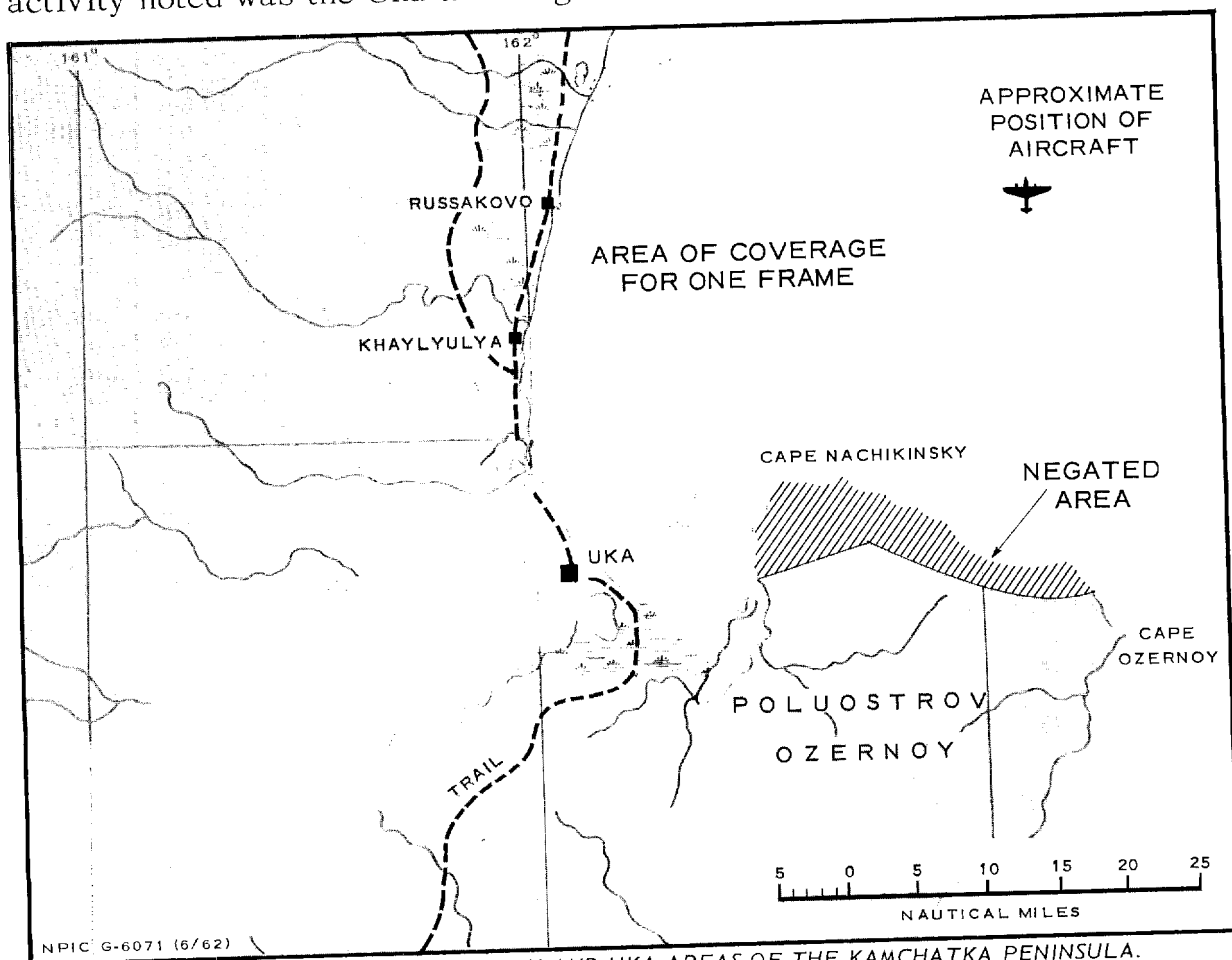

FIGURE 1. POLUOSTROV OZERNOY AND UKA AREAS OF THE KAMCHATKA PENINSULA.
